# Profile

I am an experienced software developer who has worn many different hats throughout my career.

My specialisation over the past decade has been in the Javascript ecosystem as a whole, but I have also acquired a solid background in other stacks, ranging across the spectrum from Front End, through to Back End and deeper still into Infrastructure.

I have been lucky enough to gain experience working on a wide variety of projects ranging from jobs for large enterprise companies to smaller high-scale high-growth companies as well as fast paced early stage start-ups.

I have experience at hands-on technical leadership of product development, as well as the mentorship and training of other engineers, and find both of these an equally important aspect of my profession.

I am highly passionate about my work, strong in my professional opinions, and am highly driven to not only produce high-quality sustainable work, but to also positively impact my community in all aspects ranging from technical expertise to diversity and inclusivity.

# Primary Toolset

### Full Stack Development

- **♣** Javascript (ES5 ES8 **\***)
- Node.js, Express
- ♣ Java 8
- ReasonML & Bucklescript
- CSS, SASS & their ilk
- THE HTML, The DOM & Web APIs
- React, Preact & their ilk
- Redux, Backbone.js, Rxjs
- **♣** Babel AST Transformation & Plugin Authorship
- Performance Analysis and Optimisation
- **♥** Git
- Functional programming, Reactive system design
- $\bigstar$  I'm not going to say ES20XX, you can't make me! ;)

## Methodologies

- Extreme Programming, Scrum
- Pair & Mob Programming

## Testing & Quality

- TDD, Automated Testing
- Jest, Enzyme, Mocha & Chai and more
- Selenium, jsdom, Browserstack

## Infrastructure

- Travis, TeamCity CI, Jenkins
- AWS, Terraform

# Work Experience

## Unruly

SENIOR SOFTWARE DEVELOPER | 2016 - 2019

Full stack development of the Unruly Ad Platform using *Javascript ES6 / 7 & Java 8* on top of *AWS-based immuatable infrastructure*.

Among other things this includes R&D of: Our Ad Exchange, *A multi-region distributed system*, servicing thousands of requests a second. Our Supply Side Platform, a *Web Application* in *React & Redux*. A variety of Video Ad Formats and *client side systems* in vanilla *Javascript*.

Leadership and mentorship of a 10 person development team and of the Product Development *Diversity & Inclusivity* group.

Owner of the Programmatic Demand strand, ensuring valuable prioritisation, research and implementation of deliverables in a lean, yet sustainable, manner.

Working in a XP environment ( *Agile, Pair & Mob Programming, Collective Ownership, & Merciless Refactoring*), I have focused on *collaboration, self organisation* and *mentorship* across technology stacks and through to product ownership.

## Loveholidays

LEAD FRONT-END ARCHITECT | 2014 - 2015

Managed a team of Javascript & Python developers working on the Loveholidays Web Application.

Led the top down rewrite of the entire website ( turning spaghetti into lasagne), converting a code base of legacy JS into a modular architecture based on Backbone.is and ES6. Incrementally rearchitected different parts of the site while still providing a stable code base for continued functional development.

Prototyped features using React and extensive AB Testing.

### **Pluralis**

SENIOR FRONT END DEVELOPER | 2011-2012

As the first employee at an early stage startup (pre round A) I was solely responsible for the design and implemention of the Front End architecture of our A/B testing product.

Using Backbone.js, Underscore, jQuery, Bootstrap, LESS and vanilla Javascript, I created a system for Multivariate A/B testing, an SDK for third-party developers and a web application for the management and execusion of A/B testing competitions.

I built several Javascript libraries, including a library for cross-build module management and a reverse CSSselector engine for persistable DOM querying.

I supported development of a backend system using Java Spring and AWS. Implemented storage solutions using MongoDB and CouchDB.

## Military

ASP.NET LEAD & DEVELOPER 2003 - 2009

Project Management, System Analysis and Oversight of a Freelance graphic designer, servicing both private clients multimillion dollar *Microsoft.Net* application.

Hands-on development, management and technical leadership of two development teams (8 people in total) working on two N-Tier ASP.Net Web Applications.

Technical design and development of Web Applications and Services in Javascript and C#.

Designed the data layer and integration with both the Oracle 9i and SQLServer databases.

Created and took ownership of a department wide position responsible for all UX and design work.

#### Freelance

R&D AND CONSULTING 2013

I designed and implemented Front End solutions consisting of application development using Backbone.js, workflow, build and test automation using Grunt.js and Back End layers and APIs using PHP Flight and Node.js Express.

Built a responsive marketing website for a mobile product including animated UX demonstrations using Bootstrap and both JS animations and CSS3 transitions.

Implemented data storage and caching solutions using Redis and MongoDB running on top of AWS.

During this time I provided services for several different companies, including ReallyGood, Conduit, Klarna and Cyhawk Ventures.

## Metacafe

WEB ENGINEER 2010-2011

Development of a Web Application using PHP and Javascript for the Metacafe portal and the site's semantic data layer in a high scale and high traffic web environment.

Designed, implemented and extended infrastructure packages using PHP for Mediawiki, Semantic MediaWiki and an in-house MVC web framework.

Integrated the Metacafe Semantic data layer with the Sesame RDF database.

Implemented caching layers using Memcached and Varnish, and tuned caching and eviction strategies in PHP and VCL in a massive scale environment (measuring several millions of request per day).

Implemented asynchronous workers using Gearman in PHP to perform offline processessing and semantic analysis of video content.

#### Freelance

WEB DESIGNER | 2002 - 2003

and companies such as HP's Indigo division.

# Open Source Projects on Github.com/gmmorris

#### > Jeff Goldblum (jg)

: A command-line JSON processor in Rust which searches for structures in JSON input and prints each matching object.

⟨/> bs-rewire : Bucklescript bindings for Rewire

Meze: A Component Composition library for Declaratively Composable Operations

⟨→⟩ Safeobj: Proxy based safe property access
Simmer: Reverse CSS Selector Engine

In addition to releasing my own projects I have contributed over the years to several community Open Source projects such as *Babel, highlights.is, mootools*.

### Education

### Officer Candidate School

SOFTWARE DEVELOPMENT MANAGEMENT | 2006

Professional diploma

Military Officer's Training, Project and Software Development Management.

### Mamram

SOFTWARE DEVELOPMENT 2003

Professional diploma

Intensive 6 month course covering development and software design principles, actual work experience in a variety of development environments such as C, C++, ASP & Javascript, Java, Perl, SQL and PL-SQL and working environments such as Windows and Unix.

COMPUTER SCIENCE MAJOR | 2002

High School Diploma

# Who Am I Really?

I grew up in Israel and spent the first decade of my adult life working as a software engineer for the IDF and several tech companies.

I am also an accomplished photographer, having exhibited in Israel and London, completed commercial jobs for clients in the Israeli entertainment industry and taken part in major art fairs.

I am a martial arts parctitioner and instructor, currently holding a *2nd Master* grade at Wing Tsun Kung Fu.

I am also an avid commentator on all things political and theological and was named one of Quora's Top Writers for 2014.

I live in order to create, which is, I believe, why I have found such warm homes in both the startup scene and the art scene.
